Scaling systems, products, & organizations

SKILLS

Languages

• Python • Java • SQL • C++
• JavaScript • TypeScript • Go
• R • Haskell • Bash

Technologies

• Cloud Infrastructure • Databases
• Service Architecture • CI/CD
• AI & Data Infrastructure

EDUCATION

University of California, Berkeley

Master of Information and Data Science
2021 - 2023 | Berkeley, US

University of Waterloo

Ph.D. Computer Science
(withdrawn)
2014 - 2015 | Waterloo, Canada
Area: Applications of Boolean functions

Imperial College London

BSc + MSc Mathematics
2010 - 2014 | London, UK
1st Class Honours

PUBLICATIONS

SPLC 2016

Best Paper Award
09/2016 | Beijing, China
A Mathematical Model of Performance-Relevant Feature Interactions
with J. Guo, E. Blais, K. Czarnecki, H. Yu

ASE 2015

Distinguished Paper Award
11/2015 | Lincoln, NE, USA
Performance Prediction of Configurable Software Systems by Fourier Learning
with J. Guo, E. Blais, K. Czarnecki

EXPERIENCE

Anthropic PBC | Member of Technical Staff

05/2026 – present | San Francisco

- Integrated multiple enterprise features (**CMEK**, Compliance API) into Claude Platform on AWS.
- Helped launch **5+** Claude models in Microsoft Foundry.
- Building Claude Platform primitives for "Platform" use cases (e.g. apps building on Claude and exposing it to their users, such as Cursor).

Meta | Software Engineer (Staff, IC6)

02/2024 – 05/2026 | San Francisco Bay Area

Reality Labs (Wearables)

- Tech led an effort to migrate >2000 E2E tests across all Wearables products to a new execution framework, making them **7x more reliable** & up to **40% faster**.

Search AI

- Brought Facebook's term-importance & content-embedding retrieval models to Threads search, increasing user sessions by **0.375%**.
- Introduced personalization to FB search retrieval, integrating high quality social signals & improving search engagement by **0.5%** while saving **0.8%** of search CPU capacity.
- Reduced peak inference failure rates of several search models from ~**10%** to **<1%** through system-level debugging.

Unit21 | Tech Lead Manager → Staff Engineer

10/2020 – 02/2024 | San Francisco

- Built Unit21's core Transaction Monitoring engine, increasing its performance by **50%** and supporting **10x** more functionality.
- Tech led migrating the entire system to a new **persistence engine**, involving **5+** teams, **25+** engineers, **4+** new components, raising the ceiling of data volume by **30x**, and reducing the unit cost by **50%**.
- Oversaw the architectural migration to **Microservices**, contributed to 3–4 services, and **more than doubled** the ML team's iteration speed.
- Grew a team from **3** to **15** people and owned many org-wide initiatives such as hiring processes & OKR planning.

Wise (ex. TransferWise) | Senior Software Engineer

10/2018 – 10/2020 | New York

- Developed an optimized internal development environment on Kubernetes, improving setup time from **2h** (50% failure rate) to **6min**.
- Consulted teams across global offices to migrate **50+** services onto Kubernetes & the cloud.
- Established a Spring Boot service template that became the default way of creating new services, used for **100+** of them.

Others | Software Engineer

09/2015 – 10/2018 | Toronto, Canada

- Lead Engineer **@Kooltra**, a Foreign Exchange back office system.
- Software Engineer **@Connected**, building a prototype IoT platform.
- Software Engineer **@OANDA**, a currency trading company.
